Comfort

Comfort

The Comfort
The basic model in the Comfort range.
It sets new standards in terms of design and technology. The Comfort provides a whole range of typing advantages both in its overall appearance and in its regard to detail. Its timeless, modern style gives any office a pleasant, up-to-date look.

The curved lines of the Comfort's top cover and side panels and its smooth, sculptured keys attract use - facts which have resulted in an imaginative, ergonomic design.

The Comfort is extremely easy to use; a factor which is obvious by just glancing at the keyboard. All the key functions are clearly labelled in plain text, so there are no puzzling symbols.

The ribbon capacity has been increased. The Long-Type cassette now has a capacity of 105,000 characters. A reloadable "Eco²"-cassette is also available.

Thanks to the Comfort's unique "glide open" top cover, changing the printwheel, correction tape or ribbon cassette is a quick, simple operation.

The keyboard height of 1.3" complies with industrial standard for typing comfort. This, together with the light touch of the keyboard, ensures you don't get tired from typing.

The use of modern technology has also enabled the noise level to be reduced. At less than 60 dBA, the Comfort sets new typewriter standards.

The "i" interface port, integrated in the Comfort, means that you can upgrade the typewriter by connecting various options; e.g. by connecting the Printer Box, the Comfort can be used as a letter quality printer for a PC.

	Functions		Comfort
Printer	Printing speed		20 char./sec.
	Noise level		60 dB A
	Max. paper width		381 mm
	Max. typing width		297 mm
